CIA/RR-GM-8	The Mt. Scopus Problem	
G/I-257	Soviet Advances in the Antarctic	
G/S-38	Annotated Irrigation Map of the Punjab Area	
<div></div>		

B. Progress of Work in the Branches and Staffs

As is usual for July, leave of one kind or another accounted for many man hours during the month. Nevertheless, progress on work under way was satisfactory.

Near East/Africa Branch: The Mt. Scopus Problem, CIA/RR-GM-8, was completed and disseminated during the month. The Branch conducted, for the Geographic Area, a seminar-type briefing on the Middle East crisis. This briefing involved a very short lecture followed by active audience participation in discussion. Three lectures were delivered at the OTR course on Africa. An unusually large number of spot requests for information were received during the month.
